Cutting Buds

Harrisons' "Bud Strains"

Some fifty years ago, and almost every year since, Harrisons' have planted orchards, not alone for fruit but principally to secure the type of parent fruit tree that was characteristic of a "variety" dominant in bearing qualities coupled with health, vigor and ability to withstand changeable climatic conditions. This type of tree became the parent supplying the budding sticks for future orchards in America and true-to-name varieties were assured.

Our Friends:

Have you a copy of Harrison's first catalog issued sixty years ago? It contained the best varieties of its time.

Yet, today it would be obsolete. This is primarily due to the advancement of the practical method of bud selection from trees of superior strains and extra heavy bearing habits originated by Harrisons, combined with other propagation improvements fostered by leading horticulturists, as well as Federal-State Experimental Stations.

Apples, Peaches, Roses, etc.—yes! The entire list shows marvelous progress. An infinite number of new varieties, many of them superior in strain, form, color and size await the planter.

However, this abundance of new varieties has tended to confuse the problem of selection. The Harrison organization have assumed the responsibility of choosing the best, after careful scientific and practical tests, thus avoiding those varieties that lack merit, that would produce uncertain results, consequently protecting our customers. With this objective, the Harrisons' have discarded hundreds of varieties, both old and new, and have limited ourselves to cataloging only the best in every group, from the standpoint of performance and superiority.

HARRISONS' Fruit Trees and Small Fruits are TRUE TO NAME, earlier to bear, and yield larger crops because they are scientifically propagated from SUPER SELECTED STRAINS. Likewise, the parent plants used for propagating our Ornamamentals are of the finest types for their respective varieties.

We send you this catalog in the hope that you will take advantage of our high quality nursery stock which we are offering for 1944.

Appreciatively yours,

HARRISONS' NURSERIES,
Harrison Brothers, Props.

G. Hale Harrison, General Manager.

FRUITS and ROSES

Save Years of Waiting

Bud-Selection Plus Whole Root Propagation Gives
Harrisons' Trees Year Ahead Start

The root is the heart of a tree. It enables nutrients in the soil to reach the tops and branches, causing growth. Every fruit tree we sell and grow is scientifically propagated on whole root seedlings, resulting in extra vigorous top and fruit growth. It costs more to grow trees by this method but results are what count. You can count on Harrisons' Trees to give you bumper crops of Quality Fruits years ahead of ordinary trees.

Growing practices do make a difference.

Now is the Time to Plant

U. S. Government authorities are urging a large increase of Family Tree Plantings to take care of the alarming decline of fruit production.

Health authorities recommend eating twice as much vitamin-packed fruit. Many well known authorities predict that within a few years fruit production will be so low that only those who grow their own will have enough to supply their family requirements.

Make your planting this season. Use Harrisons' early-to-bear trees and plants.

Buying Fruit Trees is an Act of Confidence

Your future success and profit from your investment depends on factors you cannot see—the skill and experience of the nurseryman, the type of parent tree that is used in propagation, the willingness of the nurseryman to stand back of every one of his claims.

For 60 years the Harrison organization has been supplying fruit trees to an ever-widening circle of customers, until today Harrisons' Nurseries are the largest growers of fruit trees in the world. This demand we believe is due to the profit-producing proven heavy yielding, bud selected strain fruit trees we are producing plus absolute dependability and square dealings. Thousands of reports from enthusiastic customers, hundreds of year-in-and-year-out customers, are proof that you can depend on Harrisons' Fruit Trees. You buy them without risk and with assurance they will yield you the greatest possible profit.

Fruit is food

Grow Your

HARRISONS' SPECIALTIES

Fruit Trees, Strawberry Plants, Grape Vines, Asparagus Roots, Small Fruits, Roses, Shade Trees, Evergreens, Shrubs, Vines, Hedge Plants, Azaleas, Boxwood, Peonies.

Gardening for Victory

Throughout America, millions and millions of Americans are turning to the soil to produce fruit and food for their tables and to ornamentals for relaxation from mental strains and over work. Fruit is food. Grow your own, make preparations to can as much food as possible. Food will help win the war and write the peace.

We are trying to do our part by growing thousands and thousands of bushels of apples, peaches, soy beans, corn, etc., as well as fruit trees, small fruits, ornamentals, etc., that are capable of producing a lot of food and pleasure to thousands and thousands of people on the home front.

60 YEARS OF

OVER 4,000
ACRES

This is Your PROTECTION

Every customer is assured of Harrisons' Hi-Quality Trees and Plants at all times. Expert growing on proper soils, careful digging and packing is Harrisons' policy on every order. Every tree and plant we ship is guaranteed to be strictly first class, free from injurious diseases and insects and to reach you in good condition.

Any time trees or plants are received that do not meet these standards they will be replaced free of charge or your money refunded.

Continued growth depends on soil, weather conditions, planting and after care. After ten days it is mutually understood that the nursery stock is satisfactory; however, we will replace nursery stock that dies from unavoidable causes at half price, if notified within two months after its arrival.

Harrison's — The Nation's Fruit Tree Nurseries

One of the Famous Harrisons' Apple Orchards in Bloom

HARRISONS' "BUD SELECTION" FROM SUPERIOR STRAIN TREES

Young fruit trees, budded from selected trees in full fruit, are definitely superior to any other method of propagation. Careful examination and selection of healthy, heavily branched, heavy-yielding trees are without question the best parent trees to supply the buds for young tree inheritance.

HARRISONS' HARDY APPLE TREES

We absolutely guarantee Harrison-grown apple trees, variety for variety, to be as hardy or harder than trees grown in any locality north of us.

Harrisons' APPLE TREES

for the APPLE INDUSTRY

Apple Growing Pays Profits

BUT in order to get these profits, it is necessary to start with the best trees and the most desirable varieties. Harrisons' Nurseries have been, and are still growing, at Berlin, Maryland, the finest and best apple trees of superior merits it is possible to produce. Harrison-grown apple trees are propagated on whole root stock, insuring an unusually large root system which is the basis of plant growth. Our apple trees are scientifically budded and grafted from selected heavy bearing strain trees of the variety desired, using the bud selection system. Today we believe that we have more of the improved and best strains of apples in our nursery than any nursery concern in America. Do not allow a few cents per tree to keep you from buying Harrison-grown apple trees, the finest and by far the best quality produced on the North American Continent.

8. Reasonable Prices

9. Trustworthy

RESULTS COME SEVERAL YEARS HENCE

No one can measure in advance the future results of a newly planted orchard. Several years must come and go before the trees bear fruit. A good inheritance immediately qualifies it as a money-maker, fruit is large and true-to-name. Poor trees at any price never give satisfaction.

Sixty years of dependability and square business dealings finds Harrisons' today the best place in America to buy truly dependable trees.

Millions of Harrisons' "bud selected" fruit trees planted throughout the years are today the very backbone of a profitable and dependable fruit business in all sections of the country.

HARRISONS' TREES HAVE A GOOD RESERVE OF PLANT FOOD

Harrisons' trees are scientifically nurtured so that the trees will absorb the different latent plant growth elements so vitally necessary in the successful growth of trees after transplanting. This stored-up energy is one of the many reasons why Harrisons' trees prove successful wherever planted.

True to Name

The World's Foremost Fruit Variety Identification Specialists Have Examined Harrison-Grown Trees and Pronounced Them True to Name

In addition to carefully selecting the propagating wood from bearing trees of superior strains, we have also employed the services of Dr. A. P. French, Dr. O. C. Roberts and Dr. L. Southwick, Professors of Pomology of Massachusetts State College, Amherst, Mass. These men are the world's foremost fruit identification specialists and they have pronounced our trees true to name.

CROSS-COUNTRY PACKING

Our method of packing enables us to ship our products thousands of miles with the stock arriving in field-fresh condition. We guarantee safe arrival no matter where you live.

Little Orchards Make More Profit Than Big Farms

TODAY FRUIT GROWING is gaining on the big farms—little orchards lead the way to a profitable and worth-while fruit market.

Plant "Bud-Selected" Super-Strain Trees

**More fruit prizes are won on fruit grown in orchards planted with
Harrisons' fruit trees than any other.**

Yellow Transparent

It's a Summer Apple—First of the Year

**Ripens Early, Skin Clear Yellow, Flesh White,
Flavor Slightly Acid, Size Medium**

This is the most popular early green apple grown and has proven a profit maker in a large number of apple districts. The Yellow Transparent tree is very hardy and somewhat of a dwarf grower, bears when very young and makes an excellent filler. We believe there is a big future for the grower who plants this variety; we ourselves anticipate planting several hundred trees of Yellow Transparent this year.

Yellow Transparent First On the Market

As it ripens early in July, making excellent eating apples and selling without difficulty. There is almost no competition at this time; Yellow Transparent leads the field, and is eagerly sought for by those people who find their "apple appetites" impatient.

OTHER SUMMER APPLES

EARLY RED DUCHESS. Highly colored early apples bring premium prices. This bud sport colors red all over early in the season.

STARR. Large, attractive with bright yellowish smooth skin; sometimes marked with a faint blush and numerous russet dots; flesh yellow, fine, very tender, crisp, juicy, aromatic and of extra fine quality, bringing highest prices. Recommended to those with nearby markets, but a poor long distance shipper. Popular in Southern New Jersey.

RED SUMMER RAMBO. Harrisons' new early coloring bud sport. This new strain is much superior to the ordinary Summer Rambo.

WEALTHY. Medium to large size; round, almost solid red; flesh white or a little stained; tender, crisp, juicy, fine grained, aromatic and very good flavor. Relatively good keeper. Old variety most extensively planted in North. Tree is very hardy, withstanding unusually cold climates, vigorous, fruits at early age, bears regular and abundant crops. Tree somewhat dwarf, making a fine filler.

Harrisons' Bud Selected Apple Trees Bear Fruit Quick

A NATIONAL SCARCITY OF FRUIT TREES
There is a drastic shortage of fruit trees throughout the nurseries of the United States; as a matter of fact, the smallest supply available for 1944 orchard plantings that there has been at any time during the past fifty years.
A recent national survey shows that fruit trees will even be scarcer during the next coming two years than now. Play safe—act quick—place your order now while trees are available.

GOOD FALL AND WINTER APPLES

BALDWIN. Large, red, yields big crops, good keeper. Winter.

CHERRY RED STAYMAN. Many growers, especially in certain districts, have some trouble getting enough color on their Stayman Winesap. We offer Cherry Red Stayman to those growers who want more and darker color. This strain is lighter in color than Dark Red Stayman, but darker in color than Scarlet Red Stayman, otherwise its characteristics are the same as ordinary Stayman in fruiting, etc.

DARK RED STAYMAN. The darkest of all our Stayman Winesap strains. It is especially recommended for growers who want the dark or almost black-colored apples. It is a heavy yielder, but we prefer any of the other strains that we offer to this one.

JONATHAN. Medium to large, red, juicy. Good keeper and an excellent shipper.

LOWRY. Beautiful mahogany-red, good, medium size, round oval shape, nearly sweet, mild sub-acid; excellent flavor, good shipper, long keeper, and sells at fancy prices in export as well as domestic markets. New popular commercial variety in Virginia.

MAMMOTH BLACK TWIG (Paragon). Extra large in size and round; skin smooth, yellowish covered with deep red, the general effect being dark red; flesh tender, tinged with yellow, crisp sub-acid, aromatic, fine flavor, of excellent quality, long keeper of great value. An important commercial variety in the East. Tree is vigorous and healthy, yields big crops. Plant Delicious or Jonathan as a pollinizer.

NORTHERN SPY. Large, bright scarlet-red, with yellow markings. Flesh juicy, rich, crisp, tender, aromatic and highly flavored. Tree a strong erect grower, very healthy, extremely hardy and a free producer. We offer an exceptionally heavy bearing strain that comes into bearing at an early age.

NORTHWESTERN GREENING. Large, round, greenish yellow; juicy, firm, good quality; splendid keeper, ships well. Attractive apple when packed in bushels, demands good prices, excellent baking apple. Should not be planted extensively, because crops are not so certain, due to blossoming early. Trees are extremely hardy, vigorous, and bear very young.

RED GRAVENSTEIN. This red sport is more attractive than Gravenstein. It differs from Gravenstein only in the solid dark red fruit.

RHODE ISLAND GREENING. The Popular Northern Apple. Large, greenish yellow; flesh crisp, juicy, quite acid, firm, fine grained, tender, and of very fine flavor and quality. An excellent keeper, a popular barrel apple; brings good prices. Generally planted in New England, New York, Michigan and Canada, but not advisable to plant south of the Mason-Dixon line.

ROME BEAUTY. Large, round, red, flavor and quality above average.

STAYMAN WINESAP Big Yield Strain.

Without a doubt the heaviest yielding strain of Stayman Winesap obtainable. This strain yields bumper crops year after year. It colors to a good bright red and gets nearly solid red colored when allowed to stay on trees until fully ripe. This is an improved strain and is preferred by many growers in the East. Tested and time-proven by thousands of growers.

TWENTY OUNCE. Very large, yellow striped with red; fine quality, good keeper.

WINESAP An Apple Favorite in Virginia. Sometimes called Old Winesap and Virginia Winesap. Medium size, oblong, smooth, and a fine dark red—one of the best red colored apples grown; flesh yellow, crisp, tender, very juicy, aromatic, firm and of excellent flavor. Very long keeper and considered the best cold storage variety, keeping until July. Strong grower; comes into bearing early. Our strain produces bumper crops of the larger sized apples with plenty of color.

YORK IMPERIAL. Medium to large size, round, irregular, greenish yellow overlaid with bright red; flesh tender, firm, crisp, and of high flavor; wonderful keeper. Can be kept in cold storage until June. Tree is a vigorous grower, strong and healthy; an unusually heavy bearer.

CRAB APPLES

Priced on Page 4

**Double Purpose—An Ornamental
and Fruit Tree Combined**

HYSLOP. Deep crimson, large size, sub-acid and of good quality. Fine for all kinds of preserving, canning, etc., and good to eat fresh. Tree handsome.

TRANSPARENT. Yellow striped with red; good for eating fresh and fine for preserving. Best of all crab apples. Tree large; quick grower.

YOUNG AMERICAN. Attractive red fruit of excellent size and quality. Good as ornamental.

SUPER RED McINTOSH—A Northern Favorite

BRIGHT RED JONATHAN

We searched the country over to find a strain of Jonathan that had more color than our selected Big Yield Strain Jonathan. After thousands of miles of travel inspecting all of the new strains of this famous variety we found the one we had been looking for. It colors solid red several days earlier, otherwise it is identical with ordinary Jonathan. Growers who want more, deeper colored apples will find our Bright Red Jonathan the best colored strain obtainable.

THE APPALACIAN WINNER RED YORKING

(U. S. Plant Patent No. 125)

The Red Yorking is a "bud sport", being a mutation of the famous York Imperial. This "bud sport" originated on a tree, grown with other York Imperial trees, in Harrisons' Nurseries and later sold to Mr. W. H. Allison, near Shippenburg, Penna., for use in planting a large orchard about 30 years ago.

SUPER RED McINTOSH

An improvement on our already famous strain of McIntosh Red. Color is slightly darker and commences to color weeks earlier.

SCARLET RED STAYMAN BRILLIANT COLOR

We offer to the public the greatest strain of Stayman Winesap ever discovered. It is a true bud sport found in a Stayman Winesap orchard. Scarlet Red Stayman takes on bright red color weeks earlier than ordinary Stayman. Its ripening date is the same but can be picked earlier if desired.

A Ready Market at Top Prices

Scarlet Red Stayman is the best general purpose apple for planting in the East. Its solid scarlet-red color and its bright attractive finish causes it to command highest market prices. The fruit is large and it produces bumper crops each year.

RED ROME BEAUTY
Quality and Appearance

RED SPY—Bears Crisp, Juicy Apples

SOLID RED WINESAP

Old Winesap generally has plenty of color when planted in most sections, but for those growers who want a more solid red-colored Winesap, we recommend our new strain.

RED ROME BEAUTY

An improved Rome Beauty, identical in vigor and production. Color of fruit much brighter and solid red. Produces much higher percentage of fancy apples and also superior in quality to the ordinary strain of Rome Beauty. Red Rome Beauty is renowned for bearing at a very early age, producing bumper crops of large size apples. The tree is a vigorous, strong grower, exceedingly hardy.

McINTOSH RED

Improved Type—Heavy Yielding Strain Preferred by Many Growers in the North

Until the discovery of our New Super Red McIntosh our improved McIntosh Red was the best strain of McIntosh available. It colors solid red when climatic and soil conditions allow it to remain on the trees until it is mature. This heavy yielding strain is much superior to many strain of McIntosh, especially the dull striped kinds. If you do not have trouble getting sufficient color then we recommend you planting this time-proven, heavy yielding strain. McIntosh Red is very hardy and produces bumper crops each year. Generally considered as the best flavored apple grown. Recommended for home or commercial orchard plantings.

**GET YOUR
ORCHARD STARTED
THIS YEAR**

RED SPY

A new "bud sport" from New England. Identical with the ordinary Northern Spy in fruiting habit. Extra large size fruit, strong, vigorous, hardy trees. Comes into bearing earlier than the ordinary strain. Colors early, nearly every apple being solid red in color. We recommend it for commercial and home plantings in northern states.

King of All Red Apples

TRIPLE RED DELICIOUS

Solid bright red color month earlier than the original Red Delicious. Has all the fine qualities of famous parent strain. Plant Harrison's Triple Red Delicious to insure your future financial income.

Glorified Red Apple of the World

Ideal for Home Orchards

Harrison's Triple-Red Delicious is not only a commercial apple, but it is every bit as well adapted to the home grounds. Whether you wish to plant a thousand or if you have room for only one tree, Harrison's Triple-Red Delicious will give full value.

SOLID RED WINESAP—Fine Flavored, Long Keeper

TRIPLE RED DELICIOUS—Finest Flavored, Best of All

BETTER RESULTS Right From the Start with HARRISONS' HI-QUALITY APPLE TREES

LARGE TRANSPARENT (LODI)

A New Summer Variety

Ripens Very Early—Destined to Replace the
Ever Popular Yellow Transparent

Yellow Transparent has been a favorite for the new summer apple. Our commercial
fruits have been the most successful in the market for an apple of this type.
Consider it a great grower bearing very early. It makes an excellent filler.
The fruit is a delicious, tender fruit of medium size.

EARLY APPLE GROWERS MAKE MORE MONEY WITH LARGE TRANSPARENT

For actual profits, that's what we mean. It can be done—here's why: Yellow
Transparent has been the best in the market and generally, bring good profits
when they appear on our list. Stay on Yellow Transparent is hard to get, but
only because the earlier "Large Transparent," which ripens at the same time.

Large Transparent Apples Average Up to 1/2 Inch
Larger Than Yellow Transparent—This Means
75c to \$1.00 per Bushel Extra

GRIMES GOLDEN

Harrisons' Selected "Big Yield" Strain
BEST HOME ORCHARD APPLE

Autumn, medium sized, golden yellow, tender,
rich, aromatic, sub-acid, delicious, possibly the
best flavored apple known, and a good keeper.
No better variety exists for eating raw or for cook-
ing. Tree is very hardy and one of the heaviest
bearers known producing extra large crops an-
nually. Excellent variety for a filler, as it comes
into bearing very early. Grimes Golden is the best
pollenizer known, especially for Stayman Winesap,
Turley, Baldwin, Cortland, Rome, Winesap, Mc-
Intosh and others. Be sure to include Grimes
Golden in your orchard. IT IS EASY TO GROW.

YELLOW DELICIOUS

It's Golden!

A golden yellow apple with decided "Delicious"
characteristics. Yellow Delicious has a remark-
ably good flavor, and is most popular for eating
during the fall and winter months. Late Septem-
ber and January finds it at its best. Many people
think it superior to the famous Delicious. Fall.

A Prolific Cropper at an Early Age

The Yellow Delicious tree is very thrifty, hardy,
and a vigorous grower. It is renowned for its heavy
bearing of fruit at a very early age. You can
depend on a good yield of ripened fruit each year.

DELICIOUS

SOMETIMES CALLED STARK DELICIOUS
This is the Original Strain of Delicious

Of peculiar and distinctive shape; brilliant dark
red, flesh fine grained, juicy, crisp and melting,
flavor sweet, with a slight acid taste, with a de-
lightful aroma, very highest quality. Fall

"Bud Selected" Apple Trees Bear Larger
Crops of Quality Fruit

SPECIAL VARIETIES OF APPLES SUITABLE FOR COMMERCIAL PLANTERS IN VARIOUS LOCALITIES THROUGHOUT THE UNITED STATES

The following 45 varieties of apple trees were espe-
cially grown for commercial fruit growers, but on ac-
count of war conditions we have been compelled to
discontinue propagating these kinds. These are fine
quality trees, true to name, and this will probably be
your last opportunity to purchase any of these 45 va-
rieties. If interested, contact us immediately, and
promptly so that reservations can be made.

Harrisons' Super- Selected Trees

with their unusual substantial root system, are
proving again and again that "bud selected"
strains spell yearly profits to orchardists and
commercial planters.

OTHER FAMOUS APPLES

EARLY McINTOSH. Resembles its McIntosh parent in
appearance. An attractive uniform
fruit, medium size, tender, and juicy.
The color is a bright, healthy, attractive red
over a greenish yellow. The flavor is
sweet, with a slight acid taste. The fruit
keeps well through the winter. The tree is
vigorous and hardy, and bears early. The
fruit is a delicious, tender fruit of medium size.

DOUBLE RED BALDWIN. A new dress for this old re-
liable variety. Solid deep red color, much earlier than
ordinary Baldwin. The color makes it sell better. This
new strain is bringing new profits to the grower of Bald-
win.

RED GRAVESTONE. This red sport is more attractive
than Gravenstein. It differs from Gravenstein only in
the solid dark red fruit. Late summer.

CORTLAND. A new variety resulting from cross pollina-
tion of McIntosh Red and Ben Davis, and inheriting
the good qualities of each parent. Beautiful red apple
approximately the same size and fine flavor of the
McIntosh, but ripens three weeks or a month later.

GALLIA BEAUTY. A Rome Beauty type of apple identical
in every respect, except its earlier coloring qualities;
recommended for commercial planting. Harrisons' have
the genuine original strain of Gallia Beauty.

WILLIAMS' EARLY RED

**The Big Red
Home or Market Apple**

Just at the time when people are
hungry for a fresh, new red apple,
this superb sort comes into market.
In New York, Boston, Philadelphia,
and other eastern cities the fruit
sells about as quick as it hits the
market-house or dealer's store. It
holds its own anywhere and has
proven to be—

The Best Summer Apple

The rich bright red fruit catches
the buyer's eye and is ordered at a
price that yields the grower a good
profit. The apple is large, with
tender, crisp, white flesh, juicy and
slightly tart. The trees come to
bearing when quite young, produc-
ing freely and steadily. Fine for a
filler or permanent tree, and being
hardy, can be successfully grown in
New England states and Canada.
All orchards should include Williams
Early Red.

Peaches

A bright and PROFITABLE CASH FUTURE
Plant a PEACH ORCHARD
this Spring

The peach grower has a bright and profitable cash future—we advise you to plant a peach orchard this year, as the number of peach trees in bearing is the smallest of any time during the past fifty years.

THE REASONS BACK OF GROWING SUPERIOR STOCK

- A—Our organization has over 59 years experience.
- B—Every step in growing under the personal supervision of the Harrison Brothers.
- C—One hundred and fifty thousand trees in Harrison Brothers orchards from which our propagating plants are selected.
- D—Use of modern methods for planting, cultivating and digging.
- E—Over 4,000 acres of various types of soil.
- F—Ideal soil and climatic conditions.
- G—Co-operation with leading horticulturists and experimental stations all over the world.

Fruit Growers!

Look at fruit trees in other nurseries, then come to Berlin and see the superior quality of Harrison's true-to-name varieties at attractive prices. See the fruit trees growing in the nurseries—know what you buy. For best results, plant dependable Harrison-grown trees

TRUE TO NAME

The World's Foremost Fruit Variety Identification Specialists Have Examined Harrison-Grown Trees and Pronounced Them True-to-Name

In addition to carefully selecting the propagating wood from bearing trees of superior strains, we have also employed the services of Dr. A. P. French, Dr. O. C. Roberts and Dr. L. Southwick, Professors of Pomology of Massachusetts State College, Amherst, Mass. These men are the world's foremost fruit identification specialists and they have pronounced our trees true to name.

HARRISON'S HARDY PEACH TREES

We absolutely guarantee Harrison-grown peach trees, variety for variety, to be as hardy or harder than trees grown in any locality north of us

They Bear Larger Crops Earlier

A Nursery Sectional View of Harrison's Peach Trees Growing at Berlin, Maryland

Harrisons' Peaches

ARE A COLLECTION OF
THE WORLD'S BEST

VERY EARLY VARIETIES

JUNE ELBERTA. A big, handsome red and gold peach, highly colored, excellent quality and a dandy home peach, being a new variety. One of the earliest of the good yellow-fleshed peaches, this semi-freestone variety quickly returns cash dividends before later varieties reach the market.

EARLY ROSE. Very early. Another favorite commercial peach. White, cling, medium large size for an early peach, high bright red skin, sweet, delicious flavor. Good shipping, making it a new favorite among commercial varieties.

EARLY HALE-HAVEN. A bud sport of the well-known Hale-Haven, retaining all its characteristics, such as large size, high red color before ripening, extra fine flavor, and yet ripening a week earlier. Tests show it will keep as good as the Hale-Haven. A very promising new commercial variety. We recommend every grower to plant a few trees so as to compare its merits with other varieties ripening at the same time. We are confident that you will like Early Hale-Haven and that it will be a profitable peach for you to grow. Plant Patent No. 325. **Ten cents per tree extra.**

CUMBERLAND. An outstanding favorite early white peach. A comparatively new, white, nearly freestone variety that was developed by the New Jersey Experimental Station. The fruit resembles Belle of Georgia, both in appearance and quality, although it ripens about the same time or a little before Carman.

Early Midseason Peaches

CHAMPION. A Good Home Peach. White, freestone, very large, creamy white with red cheek, sweet, juicy, very high flavor. Champion has lost its past commercial importance because it will not carry satisfactorily under refrigeration, but as a home garden or a roadside peach, it is one of the best. Tree is hardy, large grower and productive.

GOLDEN EAST (N. J. 87). Early midseason, very large, high red color, yellow, freestone.

HILEY. Early midseason. Bears huge crops of fancy peaches. White, freestone, medium size, highly red colored and is a very handsome peach of exceptionally good flavor. Tree is strong grower, very healthy and an extra heavy bearer. You can depend on Hiley to bear heavy crops year after year. The marvelous color and wonderful flavor have made it popular on the markets.

ROCHESTER. Early midseason. Yellow, freestone, large, covered with mottled red blush; flesh yellow stained with red at pit, very good quality, prolific bearer. One of the best early midseason yellow freestone peaches for nearby markets, and highly desirable for canning.

SOUTH HAVEN. Early midseason. Yellow, freestone, large, handsome, uniform size, delicate flavor, ripens about 15 to 18 days ahead of Elberta. Tree is very hardy, good grower and a consistent heavy bearer, adapted to cold climates; produces bumper crops in mild climates.

VALIANT. Early midseason. Seedling of Elberta. Yellow freestone, productive.

A typical peach orchard, with a specimen tree, showing habit of growth, planted with Harrison grown trees from Berlin, Maryland.

JUNE ELBERTA PEACH
The Early Treat

YOUNGER BEARING

Do you want your trees to come into bearing at an early age? It is a recognized fact that trees propagated direct from bearing trees will commence to fruit at an earlier age than trees that are propagated from non-bearing scions. Harrison Grown Fruit Trees, due to the fact they are propagated from bearing trees, will produce profit-paying crops in the earliest possible time.

Extra
GOOD
for
HOME
Orchards

Harrisons' volume production has enabled us to supply you with high quality nursery products at low prices. All varieties are within reach of any home planter and fruit grower and priced to save you money. We ship everywhere. State and Federal inspected.

Leading **EARLY PEACHES**

HALE-HAVEN

Early introduction. A parent of the Golden Jubilee has been marketed and about 14 days ahead of Elberta. Yellow freestone, large, high red color, firm, fine flavored. It takes on red color early and the peaches show good red color several days before ripening, which gives it a distinct advantage for marketing. When allowed to ripen fully upon the tree its flavor is undoubtedly the best of any yellow peach. Tree is an extra strong grower and produces a bumper crop of fruit each season. Very hardy in fruit bud. One of its parents is J. H. Hale, from which it inherits its large size and fine color. The other parent is South Haven from which it attains hardiness, large crops yearly and strong growth. It is the best variety ripening between Golden Jubilee and Elberta and should be planted in every orchard.

GOLDEN JUBILEE PEACH
Yellow,
Excellent
Quality

GOLDEN JUBILEE

Early. The supreme early yellow peach. Commercial peach growers for a century have been looking for an early peach of high quality, fine flavor, yellow freestone, attractive color and firm texture, and eventually they have found it in the marvelous Golden Jubilee. This variety is a sensation in recent introduction of new varieties and is far better than any early variety of commercial importance which has been introduced in many years. It ripens about four days ahead of Carnation.

RED BIRD

Earliest of All Peaches

Very early. White skin, extra large with a bright red blush, the first peach of large size to ripen, the greatest very early money-maker.

The Sensational **REDHAVEN**

Tops All Extra Early Peaches, Earliest Yellow Freestone Peach

The new early ripening yellow peach that ripens about 10 days before Golden Jubilee.

The most promising early ripening yellow freestone peach ever introduced. A cross between Hale-Haven and Karmhaven made at the South Haven, Michigan, Experimental Station. Brilliant red color with creamy yellow background, smooth skin, almost fuzzless. Redden before it ripens. Bears heavy crops and should be thinned for best results. Every grower should try REDHAVEN. Supply of trees is limited—order early.

RED BIRD PEACH—The Best Very Early

BELLE OF GEORGIA
Finest Flavored White Peach

Belle of Georgia

Midseason. Large, white freestone, recognized as the best all around white peach. Should be included in every planting. Very hardy and productive.

ELBERTA (Original Strain)

Internationally Famous—The Standard by Which All Other Peaches are Judged

Midseason. Yellow, freestone. Fruit is large to extra large; golden yellow with brilliant shades of red; firm, juicy, rich, sweet and good flavor. Elberta has the greatest international reputation of any peach. It has been the standard for all other peaches almost since the date of its introduction. The coloring of Elberta is practically perfect. The rich, yellow skin is almost entirely covered with dark red blush upon the sunny side. The attractive appearance and the uniform large size serve to sell it almost on sight. We offer original strain trees which is the best strain obtainable.

Save Disappointment—Plant Only ORIGINAL STRAIN Elberta

Today, there are more than seven distinct types and strains of Elberta, bearing fruit in the orchards of this country. To compare the various sizes, shapes, texture and red coloring of these Elberta with those grown "on original strain trees" gives sufficient reason why they sold this year at a premium of \$1.00 to \$2.00 per bushel on the New York and other leading fruit markets.

Original Strain J. H. HALE

Our "Hales" are propagated direct from the original strain, the variety originated by the late J. H. Hale of South Glastonbury, Connecticut, and Fort Valley, Georgia, known as the Peach King of America. There are many types and strains of J. H. Hale grown, but the only one worthy of commercial importance is the original strain, which is the extra large, round, highly colored peach. The original strain necessitates cross-pollenization and it is necessary, for proper results, to plant a few Belle of Georgia or Hiley along with Hale for cross-pollenization.

Extra Large Size Yellow, freestone, extra large, beautiful red coloring, firm and of the highest quality and enticing flavor. J. H. Hale ripens about 2 or 3 days prior to Elberta.

SALBERTA PEACH
Excellent Late Variety

Late Ripening Varieties

BRACKETT. Midseason late. The fruit is rich yellow with dark
carmine cheek. Size is as large or larger than Elberta and
much better flavored. Begins to ripen a few days after Elberta.

LIZZIE. Late ripening type of Elberta, very large, freestone,
yellow, which ripens a few days later than Elberta, showing
some prominent coloring characteristics of its parent.

Sullivan's EARLY ELBERTA

An Early Ripening Bud Sport of Elberta
MIDSEASON YELLOW FREESTONE

More early ripening strain of genuine Elberta growers
have been wanting. Discovered by Mr. Sullivan in a Georgia
orchard, named "Genuine Elberta" in every character and
habit, ripens about 10 days earlier. Yellow freestone, firm
and juicy, and flavorful. Equally attractive as Elberta and is a
good keeper. Good for further home or commercial planting.

Early Elberta

Discovered by Mr. Sullivan in a Georgia orchard, named "Genuine Elberta" in every character and
habit, ripens about 10 days earlier. Yellow freestone, firm
and juicy, and flavorful. Equally attractive as Elberta and is a
good keeper. Good for further home or commercial planting.

Fruit Is Good . . .

Grow Your Own

It's Easy With Harrison's Superior
EARLY-TO-BEAR Fruit Trees and Plants

SALBERTA. A Late Commercial Peach. Yellow, freestone, large,
being a satisfactory cross between Elberta and Salway. Sal-
berta inherited the size, quality and productiveness of Elberta
and inherited the ripeness in season of Salway. This new vari-
ety is being planted commercially in many bud-growing
sections. Ripens about 10 days after Elberta.

SHIPPERS LATE RED. Midseason late. Large, round, yellow,
freestone; very attractive.

RIO-OSO-GEM. Late. See page 10 for description and price.

VERY LATE RIPENING VARIETIES

KRUMMEL'S (Krummel's Late October). Yellow, freestone,
extra large, round, deep yellow with a blush or carmine on
the sunny side, ripens late. Good keeper, and ripens late
in the season.

SALWEY. Very late. Yellow, freestone.

Sour Cherries

HARRISONS' Profitable

EASY TO GROW

Montmorency

The most popular sour cherry grown in America. It ripens midseason, is large, red, slightly acid, flesh very tender, good quality. The best shipper of all sour cherries; always commands the highest market prices in city markets or commercial canneries. When preserved at home or commercially, it is always attractive in appearance and of extra good quality.

DYEHOUSE. Ripens a week ahead of Early Richmond. The earliest good sour cherry.

EARLY RICHMOND. Exceedingly hardy and productive.

ENGLISH MORELLO. Large, blackish red cherry. Hardy and productive. Very late.

MAY DUKE. Very early, productive, an old time favorite.

MONTMORENCY—The Best Sour Cherry, Easy to Grow

HARRISON GROWN CHERRY TREES

Budded from bearing commercial orchards of superior strains. All cherries are budded on hardy grown, whole root seedlings, which, in our most favorable soil, form a large, fibrous, well proportioned root system, which is exceedingly important for the proper growth of cherries. Highest quality at most attractive prices.

SWEET CHERRIES

What fruit is more pleasing than the sweet cherry? The ideal fruit to plant in the back yard. We have a good supply of first-class trees in the following varieties:

BING. Very large, dark brown, flesh firm, sweet. Midseason.

BLACK TARTARIAN. Very large, sweet, purplish black color, juicy, rich flavor, heavy bearer and most profitable sweet variety grown. Early.

GOLDEN WAX. Large, yellow, fine flavor. Bears bumper crops. Easily grown. Midseason.

GOVERNOR WOOD. Large, light yellow, marked with red, sweet flavor.

LAMBERT. Extra large, sweet, jet black, very popular. Midseason.

NAPOLEON (Royal Ann). Large, pale yellow, bright red cheek, sweet, excellent flavor, prolific bearer. Midseason.

SENECA. Resembles Black Tartarian, but ripens two weeks earlier, rich sweet flavor.

SCHMIDT (Schmidt's Bigarreau). Large, sweet, deep black, tender, fine flavor. Midseason.

WINDSOR. Large, sweet, almost black, fine quality. Valuable late variety.

YELLOW SPANISH. Large, sweet, yellow with red tinge. One of the most beautiful and popular of the light colored cherries. Heavy bearer. Midseason.

RIO OSO GEM

The World's Largest Peach

Actual
Size

Sample of RIO-OSO-GEM Grown in Harrison's Orchards at Berlin, Maryland.
Sold only by Harrison's Nurseries in numerous states.

Another feature of the Rio-Oso-Gem is, it will take on a good color two or three weeks before ripening, and even then will retain color longer than the percentage of other varieties. When Rio-Oso-Gem is ready to pick and ship it has practically a solid red color. There is no other peach known that carries such a high percentage of red color on the fruit as this marvelous Rio-Oso-Gem.

EXPERT FRUIT GROWERS SAY O. K.

Rio-Oso-Gem has now been tested in the peach district of the United States, and the results are loud in their praise of this variety. Rio-Oso-Gem has passed the experimental stage and is now being grown in this variety, superlative in the peach district.

BIGGEST PEACH ON EARTH

The Rio-Oso-Gem is a perfect fruit. Its form is globular, slightly elongated of extremely large size, ranging in diameter from $2\frac{3}{4}$ to $3\frac{3}{4}$ inches; deep yellow flesh, very fine grain, firm texture, with very excellent flavor, being rich, sweet and slightly spicy. The coloring is unique, being a beautiful dark crimson-red, running out to lighter crimson and into a rich mottle of crimson over the orange-yellow ground color. It is a good transcontinental shipper.

Running
Mate for
Elberta*

RIO-OSO-GEM IDEAL FOR HOME ORCHARDS

TWO WEEKS LATER THAN ELBERTA

The Rio-Oso-Gem would be a peach of commercial importance when ripening at any time during the peach season but it is very fortunate that it ripens two weeks later than Elberta, which puts it at a time when there is no other variety of commercial importance as a competitor, and fills a long looked-for gap in commercial production ripening when the markets are clamoring for peaches—this variety has sold at very much higher prices than Elberta and J. H. Hale. To prolong your peach shipping season, we highly recommend to you planting the Rio-Oso-Gem. Harrison's have planted twelve thousand Rio-Oso-Gem in their own famous orchards. We have the utmost faith in the Rio-Oso-Gem and we will also make future plantings of this remarkable peach.

There is a brilliant future in store for the progressive orchardist who plants Rio-Oso-Gem peach trees.

ASPARAGUS

It's Easy with

Harrison's "Big Yield Strain" MARY WASHINGTON

Highly Profitable and Easily Grown

Being the first vegetable to come in the spring it always brings a high price on the markets. Stalks being delicious and very healthful, every garden should have a generous supply and when properly set and cared for will last a lifetime.

The Famous True-to-Name Mary Washington

Plant This Pedigreed Strain

There is no variety of asparagus as good as Mary Washington and whether you are growing for home use only or for market you cannot afford to grow any other. This wonderful new asparagus was developed and introduced by the U. S. Department of Agriculture and although it is just a recent introduction it has become famous the country over.

Rust Resistant—Profitable

Growers everywhere are discarding all other varieties in favor of the famous Mary Washington, because it is earlier, the stalks are larger, more tender and more productive than any other variety and more highly immune to rust, which means that one planting will produce profitable crops for many years.

Large—Early—Tender—Juicy

Asparagus buyers now demand Mary Washington and are willing to pay fancy prices to get it. The demand for Mary Washington is tremendous because when it is once eaten, no other variety will give satisfaction. The stalks are purplish green color, large, tender and juicy. A very rapid grower, which means many cuttings.

High Quality

ABUNDANCE. Early, large, color pinkish red changing to darker red, with thin bloom. Yellow flesh. Very juicy, sweet and tender, pleasantly aromatic. Hardy, very productive. Adaptable to a wide range of soils and climates.

BRADSHAW. Midseason, large, dark violet-red, juicy, excellent flavor. Desirable for canning.

BURBANK. Early, about one week after Abundance. Large, cherry-red with thin bloom. Flesh amber-yellow with rich, sugary flavor; high quality and very productive. A product of Burbank, the master plant breeder. Should be in every orchard.

ELLENBERG PRUNE. (Italian.) Late, medium size, freestone, dark purple, delicious. Fine for drying.

GRAND DUKE. Late. Commercial variety, purplish black, juicy, sweet, excellent for cooking.

LOMBARD. Midseason. Medium size, showy, purplish red fruit, excellent quality for canning, cooking, preserving or spicing. Prolific cropper.

RED JUNE. Early, medium size, garnet-red color, thin bloom, flesh light yellow, somewhat meaty, sweet, aromatic. Trees are healthy, hardy and productive. An early market plum.

SANTA ROSA. Early. Fruit very large, round, purplish red, flesh reddish, thin skin, firm, juicy, and has a pleasant tart flavor, or exceptionally high quality.

SHIRO (Early Gold). Early. Fruit is very large, golden yellow, semi-transparent covered with bright scarlet-red blush.

SHROPSHIRE DAMSON. Late, medium size, dark purple. Very productive. The best for preserving. The popular old-fashioned Damson variety.

STANLEY PRUNE. Midseason. Freestone, large, dark purple variety, suitable for canning and fresh fruit.

YELLOW EGG. Early. Large, golden yellow. Good for cooking. Largest and handsomest of yellow plums.

WICKSON. Midseason. Extra large size, color dark red, thin bloom, flesh amber-yellow, firm, sweet.

- 3—For Home or Commercial Grower
- 4—For Eating and Canning
- 5—Bear Early
- 6—A Harrison Brothers Specialty

BARTLETT

For home, for canning, for market, the best. Ripens during summer.

A golden colored pear, with a red cheek on most specimens. Bartlett mellows and is excellent for eating very early in the fall, yet when picked a week before it is ripe, and properly stored, will keep till late. Flavor delicious and musky; flesh buttery, rich and juicy. One of the finest pears that grows, to eat raw. A mingling of the flavor of Bartlett pear and quince gives about the finest taste of any food this world's folks have. Bartlett trees bear early, produce enormous crops, and are not nearly so subject to damage by insects and disease as some other sort. The trees do especially well with high culture.

BARTLETT PEAR
So Full of Juice
You Can Eat
Them With
a Spoon

Fancy Bartletts Bring Highest Prices

Bartlett pears always sell on the markets even when other sorts are not in great demand. The fruit is so handsome and appealing that it pays to pack it in fancy containers. Bushels or bushel boxes are best adapted. The fruit ought to be sorted and graded, wrapped in tissue paper, and arranged in the container practically the same way that you pack apples. Pears are sometimes packed in peach carriers, and sell to good advantage. Plain fruit can be sold without wrapping, in small baskets or boxes.

One or two Bartlett pear trees in the city yard will furnish a considerable amount of fruit; a half dozen will supply the family with fresh fruit and a surplus for preserving.

PLANT BIG TREES for QUICKEST and BEST RESULTS

KIEFFER

**SURE CROPPER
EASY TO GROW**

Of all the pears, Kieffer is the most easily grown. Trees are vigorous, exceptionally hardy and thrive on varied soils in any climate. Kieffer is the only pear that can be successfully grown in such southern states as Alabama, Mississippi, Louisiana, etc., and yet it is the leading commercial pear in Canada. Kieffer is blight-resistant, and can be successfully planted in large orchards.

This fruit is large to very large size; skin yellow, with light vermillion cheek; flesh yellowish white, very juicy. Noted for being a long time keeper. Most popular canning pear.

A leading commercial variety. New method of storing enables Kieffer pears to have as good flavor as other varieties.

HARRISONS' FAMOUS PEAR VARIETIES

BEURRE BOSCH. Large size, fine quality, brings highest market price. Late.

BEURRE D'ANJOU. Large, green in color, somewhat yellow when ripe, buttery, melting, rich, vinous, good flavor. Tree vigorous, hardy, prolific bearer. Very late.

CLAPP'S FAVORITE. Large size, hardy and very productive. Thrives where other varieties fail. Very early.

DOUGLAS. Very resistant to blight. A winter pear of wonderful quality, golden yellow with a faint blush on the cheek. Bears early.

DUCHESS. Very large, dull greenish yellow. Tree somewhat dwarf but a dependable bearer. Late.

GORHAM. Flavor is sweet and vinous with a very marked and pleasing aroma. Flesh is white, tender, buttery and juicy. Valuable for dessert and canning. New.

KOONCE. One of the earliest pears, free from blight, does not rot at the core like many early pears. Fruit is yellow, medium to large, delightful flavor. Very productive.

SECKEL. A beautiful and delicious little pear. One of the richest and highest flavored pears grown. Tree dwarf, bears prolific crops. Late.

WAITE. New, outstanding, high quality. Very resistant to blight. Late.

WORDEN SECKEL. A seedling of Seckel. Superior in size and color. Midseason.

Worth-While Raspberries for Your
VICTORY FRUIT GARDEN

CUMBERLAND

The Most Popular Black Raspberry

Midseason to late. This is the most popular blackcap of the present time, because of its great size, firmness, and productiveness. The fruit is the largest of the raspberry family, and is of such handsome appearance that it is sure to bring the top prices on the market.

NEW LOGAN. A new variety of raspberry, having many of the same worthy characteristics as the Cumberland, but it is more resistant to the virus. A very large berry, of fine size and quality. It does not crumble.

LATHAM

Biggest Money-Making Raspberry in America

A Blue Ribbon Winner for the Home and Commercial
Grower. It Simply Cannot Be Equalled.

The sensational yields of this variety have attracted the attention of growers everywhere, and all those who have given it a trial are praising the many unusual features they have found in Latham. After thoroughly testing Latham we find it a remarkable variety in every respect; you will be both delighted and surprised after giving it a trial.

Tremendously Productive; Large Berries. Latham is a tall, vigorous grower the canes are extra heavy, well able to support the load of fruit. The foliage is healthy, dark green, tough and leathery highly resistant to insects. Latham ripens with Cuthbert. Covers a longer fruiting season. The berries are beauties and will cause a sensation wherever they are shown. Many are over an inch in diameter and they hold this size to the end of the season. Color dark rich red.

LATHAM—The Big Red Raspberry

OTHER RED RASPBERRIES

CHIEF. A new red raspberry, that is to be a big money-maker for the grower. It has given rise to a new era in raspberry growing. It has proven itself to be a heavy producer of quality fruit that will command top prices to market.

INDIAN SUMMER. Red everbearing. Season early July through to mid-October. Berries large, roundish, conic, slightly flattened. Good in quality. Heavy yielder.

ST. REGIS. There is a demand for this fine fruit in the summer and fall. Growers make exceptionally large profits when grown for markets. However if you do not grow them for market by all means plant a few bushes for home use. St. Regis produces a big crop of fruit during the regular season and then continues bearing all summer and fall on the new canes.

NEWBURGH. The new red raspberry which is gaining popularity rapidly. Bright red, excellent shipper, high quality. Earlier than Cuthbert. A new commercial leader.

LUCRETIA DEWBERRY

Long, mammoth black berries, recognized as the leading variety. Incomparable better in every way than any blackberry you have ever seen or tasted. Lucretia is a very early bearer, ripening from a week to ten days before even the earliest blackberries. Big, uniform size makes them top-notchers in price on any market. For real profits and for home and commercial growing, Lucretia is the only variety of importance.

New the Sensational Boysenberry

**HARRISON
BROTHERS
BERLIN,
MARYLAND**

The New Mammoth Berry That Will Revolutionize the Berry-Growing Industry

Two Inches In Length

The new Boysenberry is truly a glorified Youngberry. We offer it again this year because of the tremendous large size of the berries; because of its very prolific fruiting; and lastly, because we think that it has the highest qualities of all bramble fruits.

They are just as easy to grow as blackberries. They produce a larger crop, not because there are more berries, but because each berry is so much larger. Has a rich, tangy flavor all its own.

No. 1 plants: 6 for \$1.45; 12 for \$2.10; 25 for \$3.30; 50 for \$5.50; 100 for \$9.75; 250 for \$22.50.

GARDENS

Grown by Harrison Brothers, Berlin, Maryland

For Bigger and Better Crops plant **CONCORD** HARRISONS' SUPER STRAIN

Very productive. The most popular and extensively planted grape in America. It adapts itself to varying conditions and is grown in almost every state in the union. Large, compact bunches of dark purplish black colored berries. The berries are covered with a rich bloom and are tender, but is sufficiently firm to carry to distant markets. Taste is juicy, sweet and tender.

Exceptionally Heavy Yields

Concord is a very vigorous grower, hardy and very productive. It ripens during midseason, and is rated as the best money-making commercial variety.

For QUICK CROPS Plant JUMBO GRAPE VINES

Big crops of luscious grapes, some the first season planted. No other fruit bears so much for so little attention. Our Jumbo Grape Vines have already fruited in the nursery.

We can furnish the following varieties only in Jumbo size, listed in their order of ripening: **Fredonia, Moore's Early, Worden, Elvira, Concord, Agawam, Niagara, Ives, Clinton, Catawba.**

Prices: 75c each; 3 for \$1.95; 6 for \$3.30; 10 for \$5.00; 25 for \$10.00; 50 for \$17.50.

BLUEBERRIES—Ornamental as Well as Fruitful

NEW GIANT

- Profitable to Grow
- Delicious Berries
- Very Ornamental

Once Planted Lasts a Lifetime

Blueberries are not only the largest money makers of all time commercially, but are also one of the easiest fruits to grow. The berries bring up to 75c per quart—\$400.00 per acre the third year. They are exquisitely mild, sweet and delicious and bring highest prices on the market. The demand for blueberries is practically unlimited. A planting lasts a lifetime with proper care and the plants will pay for themselves their first crop. A few bushes planted in the shrub border and in the garden will be sufficient to supply you with berries for years.

Very Ornamental

As an ornamental shrub the blueberry cannot be surpassed. For 20 years it has been known for its compact, white flowers in June. Leaves are compact, few and small, having waxy green upper and silvery undersides. Twigs are reddish brown and very showy during the winter.

Blueberries—Easy to Grow

Set the plants 3 to 5 feet apart in moist, acid soil. Fertilize with a weak manure or fish meal, mixing with it a small quantity of sand, peat, rotted leaves and pine needles or similar material. Fruit ripens over a period of several weeks. Plant two or more varieties so as to insure continuous production.

HARRISON'S' BIG YIELD GRAPE Vines

BEAR BETTER CROPS OF BETTER FRUIT.

BLUE GRAPES

CONCORD

Best of all grapes. For description, see opposite page.

CLINTON. Blue. Late. A rank grower, hardy; bunch and berry small to medium size, slightly juicy and spicy. Ripens 2 to 3 weeks after Concord.

FREDONIA. Blue. Very early. Originated by New York Experimental Station. The bunch and berry are large, with excellent, juicy, delicious flavor. Vigorous and productive. Ripens fully 10 days before Moore's Early.

IVES. Dark blue. Midseason. Quality good when fully ripe. Produces a successful market grape.

MOORE'S EARLY. Blue. Early. Bunch and berry very large. Equal to Concord in quality, health and hardiness, but ripens about 10 days earlier. It is a fair grower, valuable for garden and vineyard.

WORDEN. Blue. This excellent grape is as hardy, healthy, vigorous and productive as Concord, of which it is a seedling, but better in quality. It is sweeter, larger in bunch and berry. Several days earlier. Valuable for garden and vineyard.

The Grape Vines We Sell

RED GRAPES

AGAWAM. Red. Midseason. Large, thick skin, aromatic flavor. Vines strong, rank grower. Hardy and productive. Ripens with Concord.

CACO. Red. Midseason. Fruit is very large and handsome. A rich wine-red color. Not a very rank grower and a shy bearer.

CATAWBA. Red. Very late. Large. Flesh pulpy with rich vinous flavor. Quality good. A very desirable variety.

DELAWARE. Red. Early midseason. Bunch and berry good size, compact, flesh juicy, very sweet and refreshing. Vine very hardy and productive. A slow grower. Requires rich soil, good culture, close pruning.

SALEM. Dark red. Midseason. Bunch and berry large. Flesh sweet, tender, with rich vinous flavor. Good keeper, vigorous and productive.

WHITE GRAPES

ELVIRA. White. Early. Bunch and berry medium size. A good grape. Very hardy, productive.

NIAGARA. White. Midseason. Best of the standard light-colored grapes. Bunches of large greenish white berries change to pale yellow when fully ripe. A rank grower and very productive. Popular with vineyardists and home gardeners in the North, as well as the South.

CULTIVATED BLUEBERRIES

5 LEADING BLUEBERRIES Listed in Order of Ripening

CABOT. Plants seldom exceed three feet in height and make a broad, low bush. The color of the new growth in winter is a light red over olive. The large berries have a delicious sub-acid flavor.

RANCOCAS. The bush of slender, vigorous, upright habit rarely surpasses five feet in height. The winter twigs are a dark red. The berries are somewhat larger than those of Rubel and begin to ripen several days earlier.

CONCORD. The bush is of upright habit and at maturity exceeds six feet in height. The young growth is bright red in winter. The berries are large, frequently reaching three-quarters of an inch in diameter.

They usually ripen a few days earlier than Rubel and are fine in flavor and appearance.

RUBEL. A vigorous, productive variety. Well developed bushes stand six feet high and the winter color of the young wood is a rich red. The large berries of fine color are usually ready to pick the first week in July. Best commercial variety.

JERSEY. The bush is of vigorous habit and grows very large. The winter color of the young growth is a light red over golden brown. The berries are the largest of any here listed, light blue and ripen about the same time as Rubel.

HARRISON'S BIG YIELD STRAWBERRY PLANTS

GROWN AT BERLIN, MARYLAND, WORCESTER COUNTY

DORSETT, Early

Large Fruit—Vigorous Grower—Heavy Crops

Dorsett berries average large size, considerably larger than the Premier. In fact, their size is comparative with Chesapeake, which is the outstanding late berry. Plant growth is exceedingly vigorous, berries are more vigorous than most other varieties. Dorsett yields large crops of fancy, light red berries.

FAIRFAX, Early

The Sugar-Saving Berry

Color is a deep, full red; its rich, sweet flavor brings buyers back for more. Fairfax berries are exceptionally firm, making it an ideal berry for shipping. Superior to all for home use, equal to any for commercial purposes.

**GROW YOUR OWN
LUSCIOUS STRAWBERRIES**

BIG JOE

PICK WORLD'S FINEST BERRIES FROM YOUR OWN PLANTS

A Big Profit From Your Own Back Yard

Everybody prefers the flavor of vine-ripened strawberries. They are more delicious and usually sell for 10c to 20c more per quart. Customers pay premium prices for garden fresh strawberries and small growers make real money, up to \$500.00 per acre.

Whether you have a small garden or several acres, you can make a big extra cash income by planting Harrison's "Big Yield" strawberries. Others are doing it, why not you? It costs only a few dollars to get started.

PREMIER King of the Early Berries

Too well known to need much description. The standard early berry by which all other varieties are judged. Holds all records for big crops and big profits. Premier has filled more crates, made more dollars, and brought joy to more strawberry growers than any other variety ever grown.

Adapted to All Soils—Heavy Yielder. It thrives on most any type of soil and is a rampant plant maker. Premier fruits extra early when berries are selling at a high price. It is a big yielder of big bright red berries of fine flavor. For home garden, local market, or for shipping moderate distances it has outclassed all the other varieties.

BIG JOE The Old Reliable Midseason Variety LARGE YIELD—FANCY FRUIT—FINE FLAVOR

Big Joe is a heavy producer of large, brilliant red berries of extra fine flavor and is firm enough to withstand long shipments. The plants are good growers and heavy yielders. This variety succeeds on all types of soil but does extra well when given good care and fertility. Be sure to include some Big Joe in your planting this spring. Our big yield strain insures big crops.

CATSKILL Midseason

A midseason berry that will produce the largest crop of bigger berries of any midseason variety we know. Catskill is entirely satisfactory as to firmness, quality, color and attractiveness, season of ripening and climatic adaption. The highest record of marketable berries was made with this variety. In shipping respects it ranks with Chesapeake and Lupton. It is rated equally as attractive as Fairfax or Dorsett. The berries are borne on rather long fruiting stems which makes it easier to get at in picking.

CHESAPEAKE The Favorite Late Berry

It is a good producer of very large berries that hold their shape well until the end of the season. It yields as many berries per acre as some of the early varieties, but the size and quality of its fruit enables it to sell for a much better price and without this disadvantage. The berries are firm enough to hold to a first market and to arrive in first-class condition. An excellent variety for home use, but equally adapted for home planting. We offer a selected "Big Yield" strain.

HERE'S A NEW ONE RED STAR Extra Good—Very Late

This is the other new one by the U.S.D.A., and a cross between the Chesapeake and Fairfax. This is the late one. Berries are large, and are borne on short stout stems that stay well under the leaves, thus protecting them from the frost. Makes a good fruiting row, and plenty of money can be made from growing this berry. Late berries always bring a high price.

3 REAL CROPS—3 BIG PROFITS

**Bears in 90 days, and, too, it's the best
Family Garden Strawberry**

Loads of Big Berries in 90 Days

Unlike the other varieties, Mastodon begins to bear luscious berries three months after planting and bears three big crops in eighteen months. Customers have reported yields as high as three quarts per plant the first fall.

Why Wait a Whole Year?

Plant Harrisons' "Big Yield" Mastodon this spring and grow your own berries this summer and fall, instead of buying them. If you have more than you can use, they are easily disposed of in the nearby community, where they will always bring top prices.

Gem Everbearing

New Companion for Mastodon

Get Your Berry Patch Started This Season

**Bears
100 Days
After
Planting**

Gem will start to bear the first season planted and will bear large crops until frost. These berries bring the highest prices in the markets or on a roadside stand. There is a great opportunity for making money by planting Gem. Get your patch started this season; they will give you enough berries for your own family and some to sell to your neighbors or ship to the city markets.

**EARLY
GOLDEN
APRICOTS**

APRICOTS Fine for Canning

The apricot is one of the most delightfully luscious fruits grown, when eaten fully ripe and fresh from the tree. It is remarkable that such a rich and beautiful, golden, sweet fruit is not planted more, especially since it ripens just after the early cherries and before the best early peaches.

ALEXANDER. Early, prolific, freestone, orange, with red blush; very juicy and sweet flavor. A large prolific sort that will withstand adverse weather conditions. This variety deserves greater popularity. The best.

EARLY GOLDEN. Pale orange, juicy and sweet. Is a hardy, prolific bearer; ripens first of July.

SUPERB. Very good quality. Fruit is beautiful, light salmon-colored, best of the older varieties. Tree is large, very thrifty, hardy and is extremely productive in fruit.

**SURE CROP
NECTARINE**

NECTARINES Delicious for Eating

There is a mistaken idea that the nectarine is a cross between the peach and something else, while it is really nothing more or less than a smooth-skinned peach. The melting, juicy texture of the nectarine and its delicious flavor furnishes one of the most delightful fruits for eating during the summer. Plant a few trees in your home orchard this year.

HUNTER. Large, round, yellow, freestone

SURE CROP. Very vigorous and productive. The fruits are large, roundish, white and overlaid with very attractive red. Very pleasing flavor.

Harrisons' Ornamental

CHINESE ELM—Quick Grower

AMERICAN ELM
(*Ulmus americana*)

AMERICAN PLANE
(*Platanus occidentalis*). A rapid growing shade tree for parks and street planting. The bark is grayish green and smooth.

NORTHERN STRAIN
CHINESE ELM

Grows 20 Feet in Four Years

For its rapid and extremely rapid growth, Chinese Elm is the leading shade tree of America. It is planted extensively in the native country of Korea, withstands extreme heat. It makes excellent shade in the street, averaging about 5 feet growth annually. It is the best growing hard-wooded shade tree. It is like the American Elm except the leaves are smaller, and the growth is that of a Cut-Leaf Birch.

SILVER MAPLE
(*Acer dasycarpum*). The name comes from the silver color. Underneath, these are the same shade as new, bright green on top they are light green. Many of them are carried on their edges, and when wind blows the trees are alive with green and green flashes. In the fall the leaves fade to pale yellow. Growth is faster than that of any other Maple.

ORIENTAL PLANE
(*Platanus orientalis*). A rapid, upright, clean growing shade tree, long lived, beautiful dense foliage. A superb tree of gigantic proportions, which is very hardy.

The above prices are for Lombardy Poplars only.

Stately Pin Oaks

Quercus palustris

America's Favorite Oak Tree

The tree of trees—no other tree is more beautiful—once planted the pin oak continues to grow for a lifetime. Some of the finest, most attractive plantings depend almost entirely on the stately pin oak for their landscape appeal.

Beautiful Bronze Color During Autumn

Deeply cut, bright, fresh green foliage during the summer, turning to a bright bronze color during autumn. The most graceful tree for the lawn, equally as desirable for street or roadside planting.

YOU'LL NEVER REGRET PLANTING PIN OAKS.

RED OAK (*Quercus rubra*). Growth is slow, eventually grows large. Has extra large leaves. A good shade and street tree.

NORWAY MAPLE

(*Acer platanoides*)

Typical maple leaves, large and bright green, fading to gold in the fall. Trunk and branches are sturdy and strong, lending an effect of ruggedness. Growth is slow. Branches and foliage are thick and compact, and the head is round-topped.

SWEET GUM

(*Liquidambar styraciflua*)

A shapely tree with slender, corky-ridged branches. Leaves are bright green and lustrous; in autumn they change to a pleasing tone of crimson color.

3 to 4 feet90	2.40

ALTHEA or ROSE OF SHARON (*Hibiscus syriacus*). The double and single flowers are formed in varying colors. We can supply double red, white with crimson center, and double white.

Buddleia Magnifica. New and undoubtedly the finest of all the summer-flowering Butterfly bushes. Large bright lavender panicles. Flowers do not sunburn as do other varieties. Foliage heavy rich dark green. Very hardy.

DEUTZIA, PRIDE OF ROCHESTER. Double white flowers, slightly tinged with rose, appear in mid-June.

DOGWOOD, RED-BRANCHED (*Cornus alba sibirica*). Bright red bark, white flowers, blue fruit; rapid grower; beautiful winter effect.

GOLDEN BELL (*Forsythia*). Vigorous, upright grower; profusion of yellow flowers in April. One of the best early blooming shrubs.

HONEYSUCKLE BUSH (*Lonicera morrowi*). Early white flowers in June, followed by red berries.

SPIRAEA BILLIARDI. A hardy type of spiraea that grows exceedingly well in dry places. Long, fluffy flower spikes. We offer two colors: white and pink.

SYRINGA, SWEET MOCK ORANGE or GARLAND (*Philadelphus coronarius*). Of upright habit, and produces in June a wealth of white, fragrant flowers.

SWEET-SCENTED SHRUB (*Calycanthus floridus*). Hardy native with many double, chocolate-colored flowers in May. Flowers, leaves and even the wood have a spicy fragrance.

TAMARIX, AFRICAN (*Tamarix africana*). Feathery gray-green foliage, very showy.

TARTARIAN HONEYSUCKLE (*Lonicera tatarica*). Very attractive in blossom, producing an abundance of flowers followed by red fruit. We offer pink and white varieties.

WEIGELA, PINK (*Weigela rosea*). The most popular weigela sold today. Its delicate pink, bell-shaped flowers are borne in great profusion along arching branches.

CREPE MYRTLE (*Lagerstroemia indica*). Small green, glossy leaves; very beautiful showy flowers during midsummer to fall; noticeable object in any landscape. Not hardy north of Mason-Dixon line, but most popular southern shrub. Pink and red varieties. 1½ to 2 ft., each \$1.25.

FIRETHORN—Orange Berries All Winter

summer to fall. 18 to 24 inches, 75c each.

QUINCE, FLOWERING (*Cydonia japonica*). Scarlet flowers in April and May. No doubt one of the most attractive spring blooming shrubs. 1 to 1½ feet, 60c each.

SPIREA ANTHONY WATERER. Crimson flowers in large, flat clusters. Blooms early and continues till fall. 15 to 18 inches, 65c each.

WEIGELA EVA RATHKE. Very attractive deep carmine-red flowers, making a very showy shrub. 1½ to 2 feet, 60c each. 2 to 3 feet, 80c each.

NANDINA DOMESTICA. Leaves deep, glossy green, when young tinged with red. In winter beautiful coppery tones are assumed. White flowers produced in long panicles followed by masses of small, bright red berries which are retained all winter. 12 to 18 inches, \$1.00 each.

BEAUTY BUSH. Pink tubular flowers, heavy bloomer, hardy. 2 to 3 feet, \$1.00 each.

The Glorious Spirea Van Houttei

This grand shrub has done more to beautify the homes of America than any other variety. It is valuable as a specimen in groups in border planting and for hedges. The branches are slender, drooping, covered with white flowers in April or early May. It grows in any place either in full sunlight or partial shade. Disease resistant, hardy, thrives under adverse conditions. Ultimate height 6 to 8 feet but can be kept lower by trimming. The most popular shrub. We have an extra fine supply of first class plants this year and are pricing them especially low.

	Each	3 for	10 for

HANDSOME IRISH YEW

IRISH·YEW *taxus baccata Hibernica*

Fine Soft Lustrous Foliage

An ARISTOCRAT from OLD IRELAND

This evergreen is the aristocratic member of the yew family. It grows tall and narrow with its dark green, pointed leaves which are dark green in color. This Yew is very scarce, but everyone who sees it is enthusiastic about it. Formerly it was imported from Europe, but after all importations were discontinued by the Federal Government, American nurserymen were unable to supply their customers. Fortunately we had some specimen plants in our nurseries from which we were able to propagate.

A TYPICAL FOUNDATION PLANTING

BEAUTIFUL RETINOSPORAS

Dainty and Feathery—So Picturesque in the Foundation or Rockery

PLUME-LIKE RETINOSPORA (*Retinospora plumosa*). A handsome evergreen with feathery, light green foliage, more beautiful than a fern. Excellent for foundation plantings; can be kept pruned to any desired height.

VEITCH'S SILVER RETINOSPORA (*Retinospora squarrosa veitchii*). Foliage silvery blue, warm, dense, giving a soft, woolly appearance. Its pyramidal outline, can be kept to any height by trimming. One of the most beautiful.

GOLDEN PLUME-LIKE RETINOSPORA
Our Most Popular Golden Tinted Evergreen

A handsome golden colored evergreen that is admired by all. Its pleasing shade provides the right amount of contrast when it is planted along with other evergreens along its side or back of it. Feathery, fernlike foliage can be kept trimmed to any size. No home foundation plantings are complete without this remarkable healthy evergreen.

The Useful SPIRAEA VAN HOUTTEI

SPIRAEA VAN HOUTTEI

Always Makes an Attractive Hedge

This grand shrub has done more to beautify the homes of America than any other variety. It is valuable as a specimen, in groups, in border planting and for hedges. The branches are slender, drooping, covered with white flowers in April or early May. It grows in any place either in full sunlight or partial shade. Disease resistant, hardy, thrives under adverse conditions. Ultimate height 6 to 8 feet but can be kept lower by trimming.

RED-LEAVED BARBERRY

(*Berberis thunbergi atropurpurea*)

A highly important introduction among shrubs, giving us for the first time a practical, easily grown shrub of medium height, with good, distinctly red foliage. This must prove a boon to all types of landscaping, where studied contrasts are to be worked out with the shrub foliage depended on for colors.

	1 to 9 Plants	10 to 49 Plants	50 to 300 Plants
15 to 18 inches	\$0.40	\$0.35	\$0.25

GREEN BARBERRY

(*Berberis thunbergi*)

The best low dense hedge plant grown. Its abundant, small light green leaves, which turn to rich colors in autumn, and its wealth of scarlet berries make it very attractive. Extremely hardy and requires but little pruning. Ornamental and graceful the whole year.

Plant DWARF BOXWOOD Along Your Walk

DWARF ENGLISH BOXWOOD

Ideal for Dwarf Hedges. Make your home grounds the show place of your community. Dwarf English boxwood is the ideal low growing plant to add the finish touches to your home grounds. It stays green all winter and provides your planting with year around beauty. Can be trimmed if desired, but not necessary, unless you want the strictly formal effect.

PRICES OF DWARF ENGLISH BOXWOOD

	Each	2 for	10 for
4 to 6 inches	\$0.75	\$1.40	\$6.50
6 to 8 inches	1.15	2.00	9.00

Very similar to green barberry, except it grows upright instead of spreading; glossy green foliage, pyramidal habit, bears a profusion of scarlet berries which stay on the bush well into the winter months. May be trimmed any desired shape. Hardy, can be used for hedges or individual specimens without pruning.

UPRIGHT BARBERRY

GREEN BARBERRY—Green in the summer, turning to a brilliant coppery red in late fall, a protection against small animals, because of the sharp thorns. This type of hedge is practical and inexpensive.

BUSH ARBUTUS—Everblooming

BUSH ARBUTUS *Abelia Grandiflora*

One of our beautiful, popular and satisfactory blood-leaved evergreens. The graceful, drooping stems and branches are covered with dark, glossy leaves, which in winter assume a metallic sheen. From the middle of June until frost, this plant produces an immense quantity of tubular-shaped white flowers tinged with pink, about an inch long, which are borne in clusters. Good for shady locations.

	Each	2 for	10 for
1 to 1½ feet	\$1.50	\$2.70	\$11.50
1½ to 2 feet	2.00	3.80	17.00
2 to 3 feet	2.50	4.70	21.00

BERBERIS JULIANAE. A beautiful and rare evergreen variety. It stays perfectly green during the winter and blends well with other evergreens and broad-leaved evergreens.

	Each	2 for
1½ to 2 feet	\$1.75	\$3.00
2 to 3 feet	2.25	4.00
3 to 4 feet	3.00	5.50

EUONYMUS. Columnar upright grower, glossy evergreen foliage. Thrives under adverse conditions. We offer 2 kinds: Solid green leaves or leaves variegated with golden color.

	Each
12 to 18 inches	\$1.50

LIGUSTRUM LUCIDUM. Large thick, shiny dark green leaves, white flowers, black berries in winter.

	Each
15 to 18 inches	\$1.75
1½ to 2 feet	2.75

PERIS FLORIBUNDA. Evergreen, waxy white flowers, in May. Good deep green foliage, best in half shady places, very hardy.

	Each
12 to 18 inches	\$2.25

SOUTHERN MAGNOLIA (*Magnolia grandiflora*). The finest large growing broad-leaved evergreen tree. Large glossy leaves, handsome white flowers during summer. Trees grow pyramidal in form and often attain 50 feet or more in height. Its flowers are followed by large pods covered with brilliant red seeds.

	Each	2 for
1½ to 2 feet	\$2.75	\$5.00
2 to 3 feet	3.50	6.30
3 to 4 feet	4.50	8.00

AZALEA AMOENA

Rosy Purple Flowers — Evergreen Foliage

A dense dwarf growing shrub with slender branches and semi-double flowers of a bright rosy purple color. Evergreen foliage that makes it very attractive when out of bloom. Grows satisfactorily in shade as well as in full sunlight. More hardy than the other kinds and its wealth of bloom in the early spring is a delight to everyone who sees it.

Possibly no evergreen shrub has been so much used for marking the boundaries of formal gardens, to outline flower beds, for low hedges, and for other ornamental purposes. The plants will adapt themselves to almost any situation and climate, and by judicious pruning can be trained to many forms.

Compact—Deep Glossy Leaves

Our boxwood has deep glossy green leaves. They are dense, compact specimens, having been sheared many times. The leaves on this variety are small and resemble the dwarf English boxwood. This variety is a dwarf grower, but it makes much faster growth than the English boxwood. For those who want large boxwood plants in a few years, this is the best variety to plant.

AMERICAN BOXWOOD
For All Around Utility

Dwarf English Boxwood

(*Buxus Sempervirens Suffruticosa*)

A widely known and popular form of dwarf boxwood. It has small deep green dense leaves which hold their bright color throughout the winter months. Suitable for very low hedges and edgings; can be trimmed in various forms.

Easy to Grow. Dwarf English boxwood is easy to grow and will thrive in most every type of soil. After this plant once becomes established, it does not require any particular attention. It is practically immune from all diseases and insects. Can be planted in the full sunlight and semi-shady locations.

Large Specimen Plants Sell at High Prices. Dwarf English boxwood has been called the "Century" plant, due to its ability to live over a hundred years. A few years ago, large plants sold for fabulous prices, many selling for hundreds of dollars.

Ideal for Dwarf Hedges. Make your home grounds the show place of your community. Dwarf English boxwood is the ideal low growing plant to add the finish touches to your home grounds. It stays green all winter and provides your planting with year around beauty. Can be trimmed if desired, but not necessary, unless you want the strictly formal effect.

EVERBLOOMING HYBRID TEAS

Ani Quinard Very dark crimson-maroon, semi-double flowers. One of the darkest roses known and under certain conditions appear to be black. Very free bloomer, healthy grower. The most spectacular dark rose.

Condessa de Santiago Marvelously colored rose of coppery red inside and rich yellow outside. A profuse bloomer at all times, keeps well when dry, and is spicily fragrant. Compares with the Radiance rose in vigor and hardiness.

Etelle de Hollande At present considered most popular of crimson hybrid roses. Velvety scarlet-crimson with delicious fragrance, and numerous petals. It charms continuously with its delightful, vigorous growth, and well-formed flowers on long, healthy, medium height, and very hardy.

Victoria Perfect creamy white bloom, long lasting, and full. Long shapely, intensely scented bloom. An unsurpassed.

Yellow Generally considered the finest yellow rose. Blooms of soft lemon-yellow markings, long-lasting fragrance of lemony, medium height, and very hardy.

Mrs. Chas. Bell A delicate, refined shell-pink shade, intensely fragrant. Very vigorous, tall and bushy. A sport of the ever-popular Pink Radiance, and sometimes called "Shell-Pink Radiance." An exquisite rose that should be in every garden.

Mrs. E. P. Thom Deep yellow buds, with carmine markings, opening to semi-double, clear lemon-yellow, never fading blooms. Similar to Souv. de Claudius Pernet, being among the best yellows, grown successfully throughout the United States.

Mrs. Pierre S. du Pont Medium sized reddish gold buds open to a semi-double golden yellow that is a glorious sight from early summer until freezing weather. Moderately fragrant. Vigorous, compact, glossy foliage. The "ace" of the golden yellow roses.

Pink Radiance A brilliant carmine-pink with yellow shading at base of petals, having a light silvery tone on the inside, and deeper on the outside. Vigorous, free bloomer, parent of Red Radiance. Among the oldest roses, planted everywhere because it has made good everywhere.

Pres. Herbert Hoover One of the outstanding roses. A glorious new rose of vivid cerise-red toned with yellow, orange and scarlet, richly perfumed and free flowering.

Red Radiance A sport of the famous Radiance and identical in all characteristics except color. A brilliant cerise-red color, and intensely fragrant. Tall and bushy, healthy foliage and excellent blooming qualities. The favorite red rose of America's millions.

Talisman A multi-colored glorious combination of orange, yellow and rose-red. They simply eclipse other roses in autumn. Fine for both decoration and cutting. The triple-tone flowers are produced all season.

Paul's Scarlet Climber Large, intense scarlet blooms; freely produced. It is strong and perfectly hardy. The most popular climbing rose. Same price as other varieties of roses.

Money Back

In the event that any nursery stock sold by us should prove untrue to name under which it is sold, we hereby agree, on proper proof of such untruthfulness to name, to replace the original order or to refund the purchase price. Except for such liability, and in respect to all nursery stock sold by us, we give no warranty, express or implied, as to description, quality, productiveness or any other matter.
